

CONTENTS

W. Batko, L. Majkut: Classification of phase trajectory portraits in the process of recognition in the changes in the technical condition of monitored machines and constructions	7
J.M. Czaplicki, A.M. Kulczycka: Steady-state availability of a multi-element symmetric pair	15
W. Grzegorzek, S. Ścieszka: Prediction on friction characteristics of mine hoist disc brakes using artificial neural networks	27
A. Katunin: The construction of high-order b-spline wavelets and their decomposition relations for fault detection and localisation in composite beams	43
A. Sowa: Problem of computer-aided technical state evaluation of rail-vehicle wheel sets	61
M. Styp-Rekowski, L. Knopik, E. Mańka: Probabilistic formulation of steel cables durability problem	69
M. Ważny: An outline of a method for determining the density function of the time of exceeding the limit state with the use of the Weibull distribution	77
